

The Palestinian Neuroscience Initiative
Faculty of Medicine
Al-Quds University

We are delighted to invite you to attend the second neuroscience mini-symposium by the Palestinian Neuroscience Initiative and the Deanship of Scientific Research at Al-Quds University, entitled:

**BRAIN RESEARCH:
BROADENING THE UNDERSTANDING**

June 2nd 2013, 11:00am-2:00pm

Where we will host five prominent neuroscientists from Italy:

Pietro Calissano (EBRI)

“An introduction to the European Brain Research Institute”

Antonino Cattaneo (EBRI and Scuola Normale, Pisa)

“The growth of nerve growth factors”

Alessandro Vercelli (University of Torino)

“Role of JNK in neuronal death in development and disease”

Ferdinando Rossi (University of Torino)

“Neural stem cell therapies”

Marina Bentivoglio (University of Verona)

“What the International Brain Research Organization does and what it can do”

The mini-symposium will be held at Al-Quds University main campus, Abu Dies, in the Dr. Fuad Jamal Multipurpose Hall.
