Symposium and Conversation on

EU–FUNDED RESEARCH IN TECHNOLOGIES FOR A HEALTHY AND ACTIVE AGING:

AN ITALIAN SUCCESS STORY

A satellite event of the 2018 ISSNAF Annual Event

October 22nd 2018 – Auditorium Embassy of Italy – Washington DC

An extremely diversified range of competencies is required to deal with the aging process and its invalidating consequences. This applies also when technologies come into play. Italy is a nation of long history in multidisciplinary scientific research. In this event, Italian researchers from very different backgrounds will present their successful stories in EU-funded research in the field.

Participants

prof. Ciriaco Carru

Clinical Biochemistry and Clinical Molecular Biology
Department of Biomedical Sciences, University of Sassari

prof. Lorenzo Chiari

Biomedical Engineering
Department of Electrical, Electronic, and Information Engineering "Guglielmo Marconi", University of Bologna

prof. Alessandro Vercelli

Neuroscience
Department of Neuroscience, University of Turin

prof. Paolo Paolini

Information processing systems
Department of Electronics, Information engineering and Bioengineering, Politecnico di Milano

Program

9.30 a.m. **Opening remarks**

prof. Ugo Della Croce (Science Attaché Embassy of Italy in the USA)
Mary Kavanagh, PhD (Minister-Counselor, Research & Innovation, Delegation Of the EU to the USA)

9.40 a.m. **Introductory lecture on longevity in Sardinia**

prof. Ciriaco Carru (University of Sassari)

10.00 a.m. **Success stories in FP7.**

prof. Lorenzo Chiari (University of Bologna)

10.30 a.m. **Coffee break**

11.00 a.m. **Success stories in H2020**

prof. Alessandro Vercelli (University of Turin)
prof. Paolo Paolini (Politecnico di Milano)

11.40 a.m. **Conversation**

12.00 p.m. **End of the event**
